This is the most reliable dolly mounted unit in the industry. It's easily maneuverable with two people and performs the same operations as larger probes.

CAPABILITIES

- Fits through standard doorways
- Easily attaches to remote power unit by way of hydraulic lines with quick connects
- Removable outriggers for added stability
- DT22 Soil Sampling for Continuous Core & Interval Soil Sampling
- Macro Core Soil Sampling
- SP22 Hydropunch groundwater sampler
- Collection of soil/groundwater and set vapor probes in a single boring
- Prepack Monitoring well installations
- Surface coring capabilities
- Ability to hoist and lower into uniquely remote and limited accessible areas
